

# Minister Barbara Creecy appoints an advisory committee to review policies, legislation and practices related to the management of elephant, lion, leopard and rhinoceros.

---

22 October 2019

The Minister of Environment, Forestry and Fisheries, Ms Barbara Creecy has announced the appointment of Mr Mavuso Msimang as the Chair of a 25-member advisory committee to review policies, legislation and practices related to the management, breeding, hunting, trade and handling of elephant, lion, leopard and rhinoceros.

The names of the committee members were published in Government Gazette 42761 (Notice No. 1317) on 10 October 2019. The Committee, also known as the High Level Panel, has been appointed in terms of the National Environmental Management Act of 1998.

Mr Msimang, previously chaired the Rhino Issue Management Process. He is presently the chairman of the Tourism Conservation Fund and former SANParks CEO, Director of Peace Parks Foundation, former Head of Rhino issue management programme, former chairperson of iSimangaliso Wetland Park Authority.

The Department of Environmental Affairs (Environment, Forestry and Fisheries) has for some time dealt with a number of emotive and complex conservation and sustainable use issues, particularly those involving keystone species. These include the elephant management and culling debate, the management of ivory stockpile, trade in rhinoceros horn, captive breeding and the emerging issue of lion bone trade. Society and the international community is divergent on matters of conservation, sustainable use and benefit sharing arising from the use of genetic and natural resources.

Irresponsible and unsustainable practices, inconsistent with the spirit and letter of the law, could be detrimental to wildlife conservation and sustainable development, thus fuelling negative public sentiments on matters of captive breeding, handling, hunting and trade in lions, elephants, leopard and rhinoceros specimens with implications on the country's conservation reputation. Equally significant is the need to enhance the contribution of conservation and sustainable use of biological resources to socio-economic development of the country.

It is for this reason that an Advisory Committee serving as a panel has been established. The Panel will, over the coming months, review existing policies, legislation and practices related to the breeding, hunting, trade and handling of elephant, lion, leopard and rhinoceros. The Panel will also review the implementation of the recommendations of the Committee of Inquiry into the feasibility, or not, of a legal rhinoceros horn trade, and any future decisions affecting trade-related proposals to the Convention on the International Trade in Endangered Species of Wild Fauna and Flora (CITES), conduct public hearings and workshops, consider submissions, scientific evidence and other forms of information, and identify gaps and make recommendations on the basis of the key focus areas.

Amongst the focus areas are the keeping in captivity and hunting of elephant and rhino, the ivory trade, rhino anti-poaching and anti-trafficking measures and community empowerment, as well as leopard hunting and the trade in leopard skins. The Panel will probe among others the breeding of lion in captivity, the hunting of lion, and the trade in lion bones and skins.

In appointing the Panel, the Minister considered among others criteria including the skills of the nominees, expertise and experience, qualifications in conservation, community interface, economics, trade and industry, legal, welfare and sustainable agriculture.

The High Level Panel Members are:

1. **Mr Mavuso Msimang** a previous winner of the WWF-SA Living Planet award, Public Service by United Nations Economic Commission for Africa award and award in Excellent Services rendered to Conservation and Prestigious Fred Packard by the IUCN World Commission on Protected Areas.
